

The conference / workshop aims at mapping German legacies in the centre of Cairo, making visible the presence of the German community in the city.

Which are the buildings built by German architects? Where are / were German enterprises or shops? Is there any story or legend related to the German community living in the metropolis?

The buildings, open spaces and stories related to the German community will be discussed and analysed, and finally published in form of postcards, a flyer, and an interactive tour.

If you are researching on /or know something about:

- German architects active in Cairo (in the past until today)
- German travellers describing Cairo in the past
- Buildings used by German institutions (in the past until today)
- German personalities (singers, actors, politicians, etc.) living in the city
- Enterprises or shops related to the German community
- ... etc.

Please send us a short proposal until the **4th of November in form of an abstract (max 200 words)** to: [vittoria.capresi@baladilab.com](mailto:vittoria.capresi@baladilab.com) For updates please visit: [www.baladilab.com](http://www.baladilab.com)
